

ARL Pro 2700 27" Heated Roller Roll Laminator

The ARL Pro 2700 is a thermal mounting heated roller laminator. It accepts films on a 1" core, up to 7 mil thick (will accept 10 mil film with a 2/8 ratio) and mounts onto boards up to 3/16" thick. Features include adjustable temperature and speed, digital temperature display, and motor key lock. The ARL Pro uses heated rollers to deliver high-quality results, whether laminating or mounting.

Highlights

- Mounts onto substrates up to 3/16" thick
- Laminates up to 10 mil thick
- 1" mandrels
- Adjustable temperature
- Variable speed
- Electric reverse
- Digital temperature display
- Motor key lock
